Boltrics
WITHOUT A DOUBT

Analytics Advanced

Direct insight in all the necessary data with the power of Business Intelligence.

Nowadays, data is everywhere. And for logistics service providers, a lot of this data is interesting. But with an overflow of information it is hard to keep a clear overview. And even if you have access to the needed information, analyzing it is easier said than done. A pity, because working with the correct data in the right way can give you major advantages. Do you have a lot of data but no overview? Or do you want to boost your company's intelligence? In short, do you want to work smarter?

Get started with Analytics Advanced today and create insight in the most important KPIs for logistics service providers at once. These were developed for you, by Boltrics. Thus, go from data to insights, from insights to actions and substantiate your decisions with facts. And discover how easy working smart can be.

Look at your data as never before

Analytics Advanced is an analytic tool that makes data visually insightful using Microsoft Power BI. This tool places relevant information sources next to each other, to show the relation between them. Next, these relations instantly become insightful in live dashboards and reports. This way, you have all the overview you need of the necessary data.

Reports for logistics service providers

Boltrics delivers software specifically for logistics service providers. And we continue this philosophy in our approach towards Analytics Advanced. We did a research on the most important Key Performance Indicators amongst logistics service providers. We processed the outcome in reports and dashboards, which are available for all of our customers.

Insight, always and everywhere

Take action with easy access to data-insights from your desk or when you are on the road. Microsoft's Power BI applications offer the possibility to stay updated all the time. Regardless of the device you use.

Trusted Microsoft software

Power BI is easily integrated with other tools, including Microsoft Dynamics 365 Business Central and Microsoft Excel. This way you can get started in no time and seamlessly collaborate with your existing, trusted solutions.

Create a data culture in your organization

Handling data oriented makes quick thought through decisions possible. Connect and explore your data with visual reports that you can use, publish and share. Convince your colleagues with facts en thus improve your processes.

Generic reports for everyone

Boltrics continuously develops Analytics Advanced based on customer requests. Do we create an interesting dashboard? Then everyone will get access to it after the coming update. This way, you always have access to the most relevant and topical insights for logistics service providers.

Lead the way with Microsoft tools

For 10 years in a row already, Microsoft Power BI scores the best Gartner's 'Magic Quadrant for Business Intelligence & Analytics'. By designing the analytics tool user friendly, complex analysis become easy. Users get insights in- and overview of their business management. This is why Microsoft is the recognized leader within this segment.

Current available datasets

With the module Analytics Advanced, dashboards and KPIs are offered through Microsoft Power BI and Boltrics' Power BI Datawarehouse in Microsoft Azure. At this time, the following dashboards are included. As said before, these sets are continuously in development.

WMS Dashboards with the following reports

a. Inventory
b. Customer Heatmap
c. Location Capacity
d. Storage Days
e. Documents
f. VAL Orders

TMS Dashboards with the following reports

a. Revenue / Cost per Truck, Driver, Customer & Service
b. Insight of Activities per Region

Financial Dashboards with the following reports

a. Results
b. Revenue
c. Payment

From data towards a successful strategy

When you make use of the aforementioned, you know what does and what does not work for you in no time. This way you can reject loss-making deals and only accept the ones with the most potential. Without any doubts afterwards. Always walk the right path and make the best strategic decisions, to enlarge your profits.

All benefits together

- The most important data clearly visualized
- Pre-programmed dashboards
- Always and everywhere accessible
- Make considered decisions
- Dashboards for TMS, WMS & Finance
- The best BI tool according to Gartner
- Centralize data in your organization
- Enlarge your profits

Our solution

Knowing that logistics service providers independently try to reinvent the wheel, inspired Boltrics to develop a branch standard. One solution that the entire branch puts it weight behind. A proven standard, always state-of-the-art solution – thanks to the development power of Microsoft Dynamics 365 Business Central. Fast, lean and decisively implemented by Boltrics, exactly according to plan. Without time-consuming customization.
