

Dynamics NAV app: inventory management and transport tasks, simply on your phone.

Do you have to make your customers wait when you don't have your laptop at hand? Does taking and linking photos with damaged goods require a lot of time and effort, causing you to accidentally forget to upload it? Save time, costs and be flexible – without being bound to your desk. Discover the possibilities of the Dynamics NAV app.

The Dynamics NAV app gives you 24/7 access to your data – anywhere and anytime. The management of stock or transport for your customers with your fingertips can now be taken very literally. For example, share a shipment document with a customer on the go, easily request information or change data – simply on your mobile device. Also record any damage directly with the app and attach a photo as proof. In this way, you can avoid delays during entry, storage and retrieval, discussion with the owner of the goods and during the delivery of goods with damage. You no longer need unnecessary hardware or other devices.

Get away from your desk and make your work easier with the Dynamics NAV app

Some application possibilities:

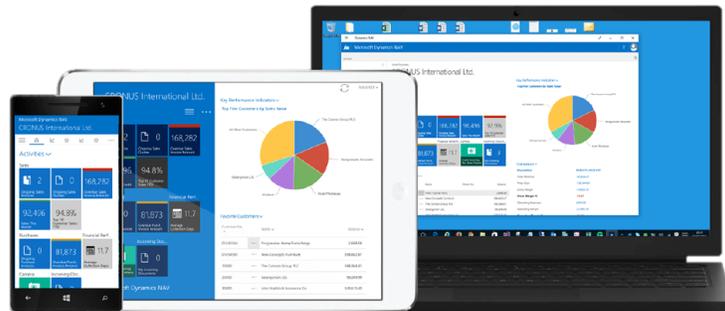

- Easily request customer information and change it directly from the app if necessary;
- Quickly and easily search for article data and stock information;
- Show the number of shipments that still have to be delivered or the status of the shipment;
- Take a photo of (damaged) goods or a consignment note and link it directly to the relevant logistics document in Dynamics NAV. Then the photo will be immediately available to your customer via the web portal.

Vriesveem Balmerd BV

“The Dynamics NAV app is perfect to use while you’re on the go. I am no longer obliged to open my laptop to quickly send a document to a customer. In addition, we save a lot of time as photos can be linked from the app to a document quickly and easily. Our colleagues also use the app on the work floor on tablets for order processing and simple, everyday processes. This allows us to support many of our processes with one single system, which saves us time and costs while offering flexibility.”

Jos van de Kant, Director at Vriesveem Balmerd
